## DETAILED ACTION

### *Response to Communication(s)*

1. This office action is in response to the Application filed on November 13<sup>th</sup>, 2003. Claims 1-20 are now pending in the application.

### *Election/Restrictions*

2. This application contains claims directed to the following patentably distinct species of the claimed invention as following:

**Embodiment 1** described in page 9, line 15 to page 10, line 24, corresponding to Figs. 2 and 4.

**Embodiment 2** described in page 10, line 25 to page 13, line 3, corresponding to Fig. 3.

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

A telephone call was made to Stephen A. Becker on 8/22/2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 2616

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tri H. Phan whose telephone number is (571) 272-3074. The examiner can normally be reached on M-F (8:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chi H. Pham can be reached on (571) 272-3179. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
